Present, not on time: N/A

Absent: N/A

Synopsis: The purpose of this meeting was to update each other on progress towards the demo on Friday, as well as connecting parts of the programs that were bugged.

Recent Accomplishments:

- Andy finished up most of the van class implementation and formatting/final touches on the development report.
- Kevin pushed the third iteration of the GUI onto to optimize the functionality, and created additional functions and onaction stability for GUI.
- Vince helped piece together github stability for project bugs, such as compiler errors and misfiles.
- Ryan has been able to parse the data from the API and form it into data structures.

Current Activities:

- Andy: Continue working with Kevin for onaction functions for buttons, as well as adding finishing touches toward the van class.
- Vince: Linking the variables for buttons from javafx and connecting it towards the FXML file.
- Kevin: More collaboration with Andy towards button functionality, and debugging.
- Ryan: Connecting API with GUI for demo.

Action Items:

- Kevin: Implement initial notification system where users can input name, userID, and vanID.
- Ryan: Populate listview with parsed data from API.
- Andy: Connect van class with backend and continue working on button functionality for user convenience.
- Vincent: Display map toward the GUI for user visibility using myController.
