Synopsis: The purpose of this meeting was to solidify the ideas and feedback from our first demo, given time to think over more of purpose of the project and will apply the constructive feedback given to our current project.

Recent Accomplishments:

- Andy worked on trying to import different map databases toward the current GUI.
- Kevin started with creation of initial notification system and help menu.
- Vince helped piece together github stability for project bugs, such as compiler errors and misfiles.
- Ryan has been able to parse the data from the API and form it into data structures.

Current Activities:
- Andy: Continue working on map implementation.
- Vince: Linking the variables for buttons from javafx and connecting it towards the FXML file.
- Kevin: Adding more features to the notification system.
- Ryan: Connecting API with GUI for demo.

Action Items:
- Kevin: Create data structures for storing user login information.
- Ryan: Populate listview with parsed data from API.
- Andy: Compare and contrast different map API's to import such as Bing, Yahoo, or Apple.
- Vincent: Display map toward the GUI for user visibility using myController.
